

APPLICATION FOR REGISTRATION IN LIEU OF PLAN SUBMITTAL

NOTE: Personal information you provide may be used for secondary purposes [Privacy Law s. 15.04(1)(m), Stats.]

**BUILDING, HVAC, FIRE
SUPPRESSION & ALARM**

This form may be utilized to register a proposed building project in lieu of plan submittal to the Department. Registration is permitted only for buildings with a total volume of more than 25,000 cf, but less than 50,000 cf under the scope of Comm 61 in accordance with table 61.30-2. Registration is also permitted for buildings with a total volume less than 25,000 cf, other than health care facilities, under the scope of Comm 61 in accordance with table 61.30.1.

MAKE CHECKS PAYABLE TO DEPT. OF COMMERCE. Attach check here.		TOTAL AMOUNT DUE (See Box 1) \$ _____ (\$20.00 for each Building Element Type checked in Box 1) Review Code 7648

UNDERSTANDINGS OF THE OWNER

As owner of this building, and by virtue of my signature on the front of this form, I understand:

1. That there will be no routine review of the construction plans conducted by the Department of Commerce for this project.
2. That there will be no routine inspections conducted by the Department of Commerce during the construction of this project.
3. That plan review and/or inspections by the local municipality may be required by local permitting ordinances.
4. That the Building, HVAC (if the building is heated) AND Fire Suppression or Fire Alarm systems (if otherwise required to be submitted per Comm T. 61.30-3) for this project must all be registered with the Department of Commerce. (This means that if the building project is registered, then the HVAC must also be registered, and can not be submitted for Department review and approval.) (This also means that if the building plans were submitted for Department review and approval, then the HVAC must also be submitted and can not be registered.)
5. That this registration does not affect the requirements to submit plans for plumbing systems, private sewage systems, swimming pools, elevators or other plans if applicable.
6. That upon completion of construction, this building will be in compliance with all applicable Wisconsin codes and standards.
7. That I am responsible for retaining a Wisconsin registered architect or professional engineer, or, in the case of HVAC and Fire Suppression, a registered designer, as supervising professional throughout the construction phase of this project, to perform periodic onsite observations and to file a compliance statement prior to occupancy.
8. That this project may be audited via plan review and/or inspection.

To qualify to be Registered in Lieu of Plan Review the volume of the entire building must be less than the volume indicated in Box 1.

Volume is defined as:

the actual cubic space enclosed within the outer surfaces of the outside or enclosing walls and contained between the outer surfaces of the roof and the underside of the lowest floor. The volume of structures without enclosing walls (canopies, roofed shelters and similar structures) will be computed by projecting imaginary vertical planes as the enclosing walls at the outer surface of the exterior supports or columns. For cantilevered structures with interior supports, the imaginary vertical planes will be projected at the farthest roof projection or overhang
